ne×t lab

This document covers minimum technical requirements for users to be able to make full use of the Golabz platform, as well as the Support area.

The Golabz platform is built using Drupal 8 CMS, is compatible and fully functional in all modern browsers that support CSS and JavaScript.

Here is the list of **desktop browsers** that are known to run Golabz platform well and support all its features:

Desktop browsers:

- Google Chrome 47.x and later
- Firefox 44.x and later
- Microsoft Edge 14.x and later
- Internet Explorer 11
- Opera 35 and later
- Safari 11.x and later

Please note that Golabz pages contain **JavaScript** that runs on user's web browsers. If JavaScript is disabled in the browser's settings, the content or the functionality of the Golabz platform can be either limited or unavailable.

Operating system:

- A required minimum version of Firefox, Chrome, Opera browser is available on XP, 7, 8, 8.1, 10, Mac OS, Linux.
- A required minimum version of Internet Explorer browser is available on 7, 8.1, 10.
- A required minimum version of Safari browser is available on Mac OS Sierra and above.
- A required minimum version of Edge browser is available on Windows 10.

Mobile browsers:

- A required minimum version of Firefox, Chome is available in the majority of Android and iOS powered devices.
- A required minimum version of Safari is available in mobile devices that are compatible with iOS 11 and above.

The platform has been designed and developed in a way to support responsive web design approach. The pages are displayed according to the user's behaviour and environment based on screen size, platform and orientation.

Recently, a number of techniques have been applied to improve the performance of the platform. But nevertheless, to ensure smooth and pleasant experience while interacting with the content of the platform, it is highly recommended to have a stable **internet connection**, starting with Good **2G and faster**.
